

## Skilled Nursing Facilities, Rehabilitation Centers and Assisted Living

### Contract Analysis and Formulary Development

All Med can assist you in determining the best products for your building. All Med's proven system of developing a concise formulary that is driven by choosing the products that are the best clinically, operationally, and financially for the building, has provided significant savings for our customers. We bring together your team for the clinical and operational decision, while also analyzing which contracts make the most sense financially. We will compare multiple GPOs to ensure you are getting the best price for your building.

### Flexible Ordering

Multiple ordering methods are available: online (1% discount applies), email, fax, or phone. If you're looking for something more advanced, our ancillary tracking and inventory control software may be the solution for you.

### 24/7/365 Service

When our team isn't at the office or on the road visiting your building, we're still available! Our round the clock voice mail is answered promptly by a member of our management team, so you can ensure your residents always have the products they need.

### Delivery When You Need It

Our team will work with you to make sure your order arrives when you need it. Next day and same day orders are available guaranteed upon your request, for a nominal fee. Orders with normal shipping requirements will ship free when the order totals \$300.00 or more.

### Turn Key Service

Opening a new building or a new wing? Or perhaps maybe just some upgrades to an area of your building or the therapy room? All Med and our partners can assist with most aspects of your project, including equipment procurement, product demos and samples, design, and room layout. We specialize in the latest therapy equipment, patient room furniture, window treatments, and much more.
