**Latitude™  
Lateral Stability Trainer**

The Latitude™ Lateral Stability Trainer uses an innovative motion to help people of all fitness levels build the muscles and confidence to stay active in an easy-to-use, engaging way. It allows users to exercise in a recumbent position and **strengthens stabilization muscles** by activating firing patterns missed by sagittal plane exercisers.

**STEP ONE™  
Recumbent Stepper**

StepOne™ provides a smooth, **total body functional movement**. It features:

- Low starting resistance
- Direct wheelchair access
- Adjustable arm length and handle angle
- Customizable programs and documentation to help users reach their goals

**PRO2®  
Total Body Exerciser**

The industry's most versatile rehabilitation tool, the PRO2® is an **upper body exerciser and lower body** recumbent bike, all in one, for a total body solution. Dependent upper and lower cranks enable passive assistance.

**Prescribed for Progress™**
