

Home Health and Hospice

In 2012, All Med Medical launched a home health and hospice division designed to meet the growing needs of this segment of the post-acute market. With the combined knowledge, skill, and exceptional customer service of our team, your organization is sure to find value in a partnership with All Med.

Individual Patient Home Delivery with fixed price delivery fee. Not only does All Med provide home delivery, we'll also do it next day within Michigan, Indiana and Ohio, if order is received by 5 pm.

Guaranteed or It's Free on Top 100 Items

Our order fill rate exceeds 98% on major product lines you order on a consistent basis. If we don't have your product or a direct comparable in stock, we'll ship it to you free.

Online Supply Order Discount for Bulk Shipments to one location. Prefer to ship to one location? All Med is happy to bulk ship, and we'll give you a discount for doing so.

Formulary Development for All Product Categories

All Med assists in developing a formulary to meet your needs and creating an easy to use online template for ordering. We take it one step further by implementing a supply purchasing hierarchy giving you the flexibility to confirm and verify orders before they are placed. If you prefer not to order online, a customizable fax order guide is also available.

Group Purchasing Organization (GPO) Contracting

All Med accesses most larger GPO pricing for high-volume items. In addition, we can analyze your current purchases to help you decide which GPO makes the most financial sense for you to join, based on historical data.

Local Distribution Centers are conveniently located for same day emergency delivery if required. Nights and weekends aren't a problem either. All Med has a 24/7/365 emergency monitored voice mail system to ensure we can always get you the products to care for your patients.

Access to Customer Loyalty Program featuring contract management, continuing education, and ancillary charge tracking.
